Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Standard symbols

The following symbols are used in Statistics Canada publications:

.	not available for any reference period
..	not available for a specific reference period
...	not applicable
0	true zero or a value rounded to zero
0^s	value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
^{p}	preliminary
^{r}	revised
x	suppressed to meet the confidentiality requirements of the *Statistics Act*
^{E}	use with caution
F	too unreliable to be published
*	significantly different from reference category ($p < 0.05$)

Acknowledgements

The Centre for Education Statistics Division at Statistics Canada sincerely appreciates the continued support and collaboration from the Departments/Ministries of Education from each province and territory and their employees who work diligently to collect and compile data for the Elementary-Secondary Education Survey (ESES) in a timely and thorough fashion.

Statistics Canada maintains a close relationship with the Canadian Education Statistics Council, particularly the Strategic Management Committee (SMC) and seeks their on-going advice and guidance on the survey.

The Centre for Education Statistics Division particularly wishes to extend its thanks to Ruth Powell, Elaine Tremblay and France Séguin for their efforts and technical assistance with the production and verification of data tables and charts.

The data

The Elementary-Secondary Education Statistics Project (ESESP, now renamed) started as a pilot project that was first introduced by Statistics Canada (STC) in 2003. The survey content originates from three (3) tables which were originally part of a survey that was sent out each year to all provinces and territories by the British Columbia Ministry of Education. Following formal consultation with all provinces, territories and data users, seven (7) new tables were introduced by Statistics Canada to collect additional data. The goal of this project is to collect elementary/secondary expenditure data and to replace several surveys which were used for the collection of enrolment, graduate, and educator data. These included the former Elementary-Secondary School Enrolment Survey, the Secondary School Graduate Survey, the Elementary-Secondary Education Staff Survey and the Principal's Statistical Report as the official collection tools for elementary-secondary enrolments, graduates, and staff data. Although this project collects expenditure data, the Survey of Uniform Financial System – School Boards survey remains active. The main objectives of this collection tool are to produce relevant, comparable and timely statistics and to reduce the respondent burden on educational organisations and school principals.

In January 2010, the name of the ESESP changed to the Elementary-Secondary Education Survey (ESES) to symbolize the change from a pilot project to an on-going core survey of Statistics Canada.

Changes in Data Collection

Private School Data Collection:

In the summer of 2010, Statistics Canada conducted a jurisdictional review and was able to ascertain that the data collected on the ESES for public schools, Enrolment (grade), Enrolment (age), Minority Language, Graduates and Educators could also be provided by jurisdictions for private schools. Therefore, in January 2011, Statistics Canada commenced collection of private school data for the 2009/2010 collection period.

Home Schooling Data Collection:

In the summer of 2011, Statistics Canada conducted a jurisdictional review and was able to ascertain that the data collected on the ESES for public schools, Enrolment (grade), Enrolment (age) could be provided by jurisdictions for home schooling. Therefore, in January 2012, Statistics Canada started collecting home schooling data for the 2011/2012 collection period.

Note to readers

Readers should keep in mind that percentage changes may be substantially larger for categories with small numbers than for those with large numbers.

While numbers in tables are rounded, all calculations were performed on unrounded values. Therefore, summing the table values may not correspond to the displayed totals.

The charts display public school data only.

The number of graduates is at the end of the school year, while population estimates are as of July 1 of the corresponding school year. Late graduates are included in the calculations. The four programs that comprise the graduate pool are: regular programs for youth, adult upgrading programs (GED), vocational programs for youth and vocational programs for adults.

All data, including financial data, are subject to revision.

1. Other: includes private schools and/or home schooling data as provided by the jurisdictions.
2. In 2008/2009, several changes were implemented to the French as a Second Language (FSL) program. One of the entry points for French Immersion in the public system was changed from Grade 1 to Grade 3. A new methodology was introduced to replace Core French, and this new program began at Grade 4 instead of Grade 1 with a significant concentration of FSL instruction at Grade 5.

Note: Data are available for English second language programs in Québec and for French second language programs in the other provinces.

1. Other: includes private schools and/or home schooling data as provided by the jurisdictions.
2. Historical revisions have been made to this table to exclude students who graduated from Adult Learning Centres registered under the Adult Learning Centres Act, effective July 2001. This has the effect of understating the number of graduates in Manitoba compared to other provinces and jurisdictions and should not be considered directly comparable.

Definitions

The collection universe

School Board encompasses district school boards, school authorities and/or their equivalent depending on the jurisdiction.

School District refers to all school boards and/or school districts.

Public Schools are publicly funded elementary and secondary schools that are operated by school boards or the province or territory. They include all regular publicly funded schools (graded and ungraded), provincial reformatory or custodial schools and others that are recognized and funded by the province or territory.

Private Schools encompass both elementary and secondary schools that, whether church affiliated, or non-sectarian, are operated, managed and administered by private individuals and/or groups (e.g. a Church, a Trade Union or a business enterprise, foreign or international agency), or its Governing Board consists mostly of members not selected by a public agency.

The extent to which an institution receives its funding from public or private sources does not determine the classification status of the institution between public and private.

Privately managed schools may be subject to some regulation or control by public authorities, but these institutions are nevertheless classified as private, provided that they are ultimately subject to private control. Public regulation may extend to areas such as curriculum, staffing appointments, admissions policies, and other matters.

The ESES does not distinguish between government dependent private and independent private institutions.

Home Schooling is an alternative method of learning that takes place outside of the public or private school environment. Parents choosing homeschooling have the primary responsibility of managing, delivering and supervising their children's courses and program of learning, which can vary from a very structured curriculum to free-form learning.

Enrolments

Headcount enrolment

Defined as the number of students enrolled in September (or as close as possible thereafter) of the school year.

Full Time Equivalent (FTE) enrolment

Defined as the number of full-time students enrolled in September (or as close as possible thereafter) of the school year, plus the sum of part-time students according to the time fraction spent in the classroom and for which students are funded. For example, junior kindergarten and kindergarten students taking a half-time program and where a half-time program is being funded, the FTE enrolment would be the headcount enrolment divided by two, which is 0.5. If a student is only taking a quarter of the usual course load and is funded on that basis, the FTE enrolment would be the headcount enrolment divided by four, which is 0.25.

Minority, aboriginal and second language programs

Regular Second Language Programs (or Core Language Programs)

Programs where French is taught to Anglophone students or English is taught to Francophone students as a subject in the regular course offerings. One or more additional subjects can also be taught in the student's second official language but second language instruction must not exceed 25% of all instruction time.

Second Language Immersion Programs

Programs where French is the language of instruction for Anglophone students or English is the language of instruction for Francophone students. Instruction time in the student's second official language exceeds 25% of all instruction time.

Minority Language Programs (or First Official Language Programs)

Programs for students from the official language linguistic minority in the relevant province or territory (French outside Québec, English in Québec). These programs allow children in the linguistic minority to pursue their education in their first official language.

Aboriginal Language as a Subject (Aboriginal Second Language Program or Core Aboriginal)

Programs where an Aboriginal language is taught as a subject (as a part of the regular course offerings). One or more additional subjects can also be taught in an Aboriginal language but may not exceed 25% of all instruction time.

Aboriginal Language Immersion Programs (Aboriginal First Language Programs)

Programs where the language of instruction is in an Aboriginal language for Aboriginal students (exclude non-Aboriginal/First Nation students).

Graduates

Graduates represent first time graduates only. They can represent late graduates but not the same graduate twice.

Educators

Teachers include personnel involved in direct student instruction in a group or one-on-one basis. They include classroom teachers; special education teachers; specialists (music, physical education); and other teachers who work with students as a whole class in a classroom, in small groups in a resource room, or one-on-one inside or outside a regular classroom, including substitute/supply teachers. Chairpersons of departments who spend the majority of their time teaching and personnel temporarily not at work (e.g. for reasons of illness or injury, maternity or parental leave, holiday or vacation) should also be reported in this category. It excludes teacher's aides or student teachers as well as other personnel who do not get paid for their employment. For teacher's aides or educational assistants see category "**pedagogical support**" below.

School Administrators include all personnel who support the administration and management of the school such as principals, vice-principals and other management staff with similar responsibilities only if they do not spend the majority of their time teaching. They do not include those who are in higher level management; receptionists, secretaries, clerks and other staff who support the administrative activities of the school; and those who are reported under "other than educators".

Pedagogical Support staff includes professional non-teaching personnel who provide services to students to support their instruction program. It includes educational assistants, paid teacher's aides, guidance counselors and librarians. They do not include those in health and social support who should be reported under "other than educators".

Educator Headcount is defined as the number of educators on September 30th (or as close as possible thereafter) of the school year who are responsible for providing services to the students.

Full Time Equivalent (FTE) Educator is defined as the number of full-time educators on September 30th (or as close as possible thereafter) of the school year, plus the sum of part-time educators according to their percentage of a full-time employment allocation (determined by the province or territory). For example, if a normal full-time work allocation is ten months per year, an educator who works for six months of the year would be counted as 0.6 of a Full Time Equivalent (FTE) or an employee who works part time for ten months at 60% of full time would be 0.6 of an FTE.
